EDUCATION

B.Tech in Computer Science and Engineering| 2023-2027

- IILM University, Greater Noida
- CGPA: 8.61

Class 12th

- Aaryan Gurukul Higher Secondary School, Brahmapur
- Percentage: 88.83%

CERTIFICATES

- Introduction to Programming in C – NPTEL
- Python Fundamentals – Infosys Springboard
- DSA in Java - Infosys Springboard

LANGUAGES

- English
- Hindi
- Odia
- Telugu

PROFILE

Computer Science and Engineering student with a strong foundation in Java, data structures, algorithms, SQL, and full-stack development. Experienced in building practical web applications using Vue.js, Nuxt.js, JavaScript, and Supabase, with hands-on experience in authentication, database design, and application development. Passionate about solving software engineering problems and building scalable, user-focused solutions.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, SQL

Technologies/Frameworks: HTML, CSS, Vue.js, Nuxt.js

Developer Tools: Git, GitHub, VS Code, IntelliJ IDEA

Database: MySQL, Supabase

PROJECTS

Colabri - project and mentor match hub with collaboration | May-2026 | *HTML, CSS, JS, Nuxt.js, supabase*

- Developed a web platform that connects students with mentors based on project interests and domains, enabling structured project collaboration.
- Integrated Supabase for database management and user authentication, supporting persistent user and project data.
- Built a responsive interface using Nuxt.js, HTML and CSS for an accessible and user-friendly experience.
- <https://colabri.vercel.app/>

Carbon Footprint Calculator with AI Reduction |

Feb-2026 | *Vue.js, JavaScript, supabase, charJs, Gemini API*

- Developed a web application that uses a custom carbon-footprint calculation algorithm to calculate users' carbon footprint by taking data over lifestyle activities of users.
- Architected supabase database for user authentication and storing users' historic carbon footprint data of users.
- Integrated the Gemini API to analyze users' footprint data and generate personalized, actionable recommendations for reducing emissions, with a reward system.

An Online Examination Platform with AI Proctoring |

Jan-2026| *HTML, CSS, JS, Nuxt.js, supabase*

- Developed an online examination platform with real-time AI-based proctoring to monitor candidates during assessments.
- Implemented authentication and integrated MediaPipe computer vision to detect multiple faces and identify suspicious activity during examinations.
