SUMMARY

Computer Science and Engineering student with a strong foundation in Java, DSA, SQL, and software development. Experienced in building full-stack applications using JavaScript, React.js, Vue.js, Nuxt.js, PostgreSQL, and Supabase, with hands-on experience in API integration, authentication, database design, debugging, REST API and Git/GitHub. Strong interest in software engineering with experience developing, testing, and troubleshooting application-level functionality through academic and personal projects.

PROJECTS

Colabri – project and mentor match hub with collaboration

May 2026

HTML, CSS, JS, Nuxt.js, PostgreSQL

- Developed a full-stack mentor matching platform with 16 pages and 10 reusable components, supporting 2 user roles(student and mentor), that connects students with mentors based on project interests and domains, enabling structured project collaboration.
- Designed a PostgreSQL schema with 7 tables on Supabase, with authentication and row-level security to protect user data.
- Built a responsive interface using Nuxt.js, HTML and CSS for an accessible and user-friendly experience.
- <https://colabri.vercel.app/>

carboninsights – Carbon Footprint Calculator with AI Reduction

Feb 2026

HTML, CSS, JS, Vue.js, supabase, Gemini API

- Implemented a carbon-footprint algorithm covering 5 lifestyle categories (e.g., transport, food, energy) with 18 input parameters.
- Architected supabase database for user authentication and storing users' historic carbon footprint data across 5 PostgreSQL tables, enabling trend tracking over time .
- Integrated the Gemini API to analyze users' footprint data and generate personalized, actionable recommendations for reducing emissions, plus a reward system with 3 levels/badges.

Jan 2026

An Online Examination Platform with AI Proctoring

HTML, CSS, JS, Nuxt.js, PostgreSQL, MediaPipe

- Developed an online examination platform with real-time AI-based proctoring to monitor candidates during assessments that detects 5 suspicious behaviors with an automatic flagging system.
- Implemented role-based authentication for 2 roles (examiner and candidate) and integrated MediaPipe computer vision to detect multiple faces and identify suspicious activity during examinations.

EDUCATION

B.Tech in Computer Science and Engineering

2023–2027

IILM University, Greater Noida

- CGPA: 8.61

Class XII

2021–2022

Aaryan Gurukul Higher Secondary School, Berhampur

- Final Percentage: 88.83%

TECHNICAL SKILLS

- **Programming Languages:** Java, JavaScript, SQL
- **Web Technologies:** HTML, CSS, Vue.js, React.js
- **CS Fundamentals:** DSA, OOP, DBMS, OS
- **Developer Tools:** Git, GitHub, IntelliJ IDEA
- **Database:** MySQL, PostgreSQL, Supabase
- **Soft Skills:** Problem-solving, Fast learner

CERTIFICATION

- DSA In Java – Infosys Springboard
- Frontend Development – Simplilearn
- Introduction To Programming In C – NPTEL

ACHIEVEMENTS

- Participated in Google Developer Club Hackathon, Qualified in first three rounds |Feb 2026
- Led a team of developers and designers in IILM Hackathon | March 2025
